

## Paper Plate Fish - Craft Instructions

### Supplies:

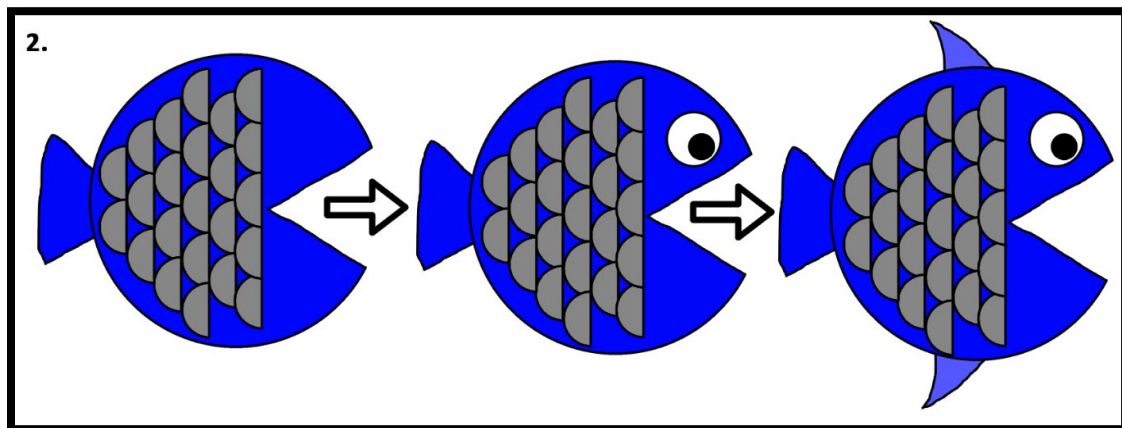

- Paper Plate
- Colored Construction Paper
- Glue
- Scissors
- Paint (skip this if you are using the kit)

### Instructions:

1. After painting the paper plate a solid color (you can skip this step if you are using the kit), cut a triangle shape out of the plate to create the fish's mouth. Then, take that piece and glue it to the back of the fish to create the fish's tail fin, as shown in the image below.

2. Next, cut out 23 small circles from construction paper. Try to make the circles as many different colors as possible (again, you can skip this step if you are using the kit). Then, fold each of the circles in half and glue them to the fish so that they look like scales, as shown in the image below. You can apply glitter to the scales too if you would like! Finally, cut out two more fin shapes from construction paper and glue them to the top and bottom of the fish.

3. And then you're all done. Great job!
